Lomas Cricket and Lawn Tennis Club

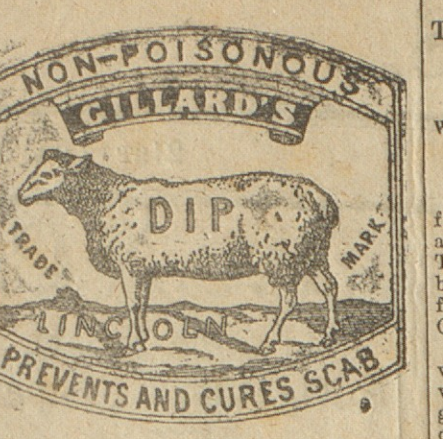

At a meeting held in Lomas on 27th June last for the purpose of forming a Cricket and Lawn Tennis Club, present Messrs. Tupper, Huxtable, Hancock, J. W. Huxtable, Drayton, Lucas, Kerner, Richards and Deane, the following resolutions were adopted:
1st.—That the Club be called the "Lomas Cricket and Lawn Tennis Club."
2nd.—That the subscription of each member for the first year be \$10 m/c.
3rd.—That Mr. George Cooper be the President, and Mr. George Cooper Vice President of the Club.
4th.—That Mr. H. E. Oxenford be the Captain and Mr. Huxtable Secretary and Treasurer of the Club for the ensuing year.
5th.—That the above mentioned officers together with Messrs. James Hogg, Huxtable and Hancock do form the Committee.
6th.—That the Captain and Secretary be empowered to look over the ground and take such steps as they may think fit to improve same, as well as to obtain all necessary tools for the Club.
7th.—That subscriptions be called in by the 1st August next.
8th.—That Mrs. Henry's be the headquarters of the Club.
9th.—That the Rules of the Club be the same as those in use by the Buenos Aires Cricket Club.
10.—That a printed copy of these resolutions be distributed among the residents in and about Lomas.
1st July, 1881

GILLARD'S SHEEP DIP
A Glycerine Compound

This Dip is most carefully prepared by the latest improved methods and can be used with **COLD WATER**
Supplied to the Prince of Wales's Farm at **SANDRINGHAM**

From Mr. John J. Mann, Capilla del Sator, June 29, 1881.—The dip which you sent me I used according to directions and I can assure you that it gave the desired result. During four years of practical experience of curing scab in sheep, I have seen many applications, and I consider Gillard's the only one that gives complete satisfaction. It improves the quality and promotes the growth of the wool. For efficiency, economy and facility of application, I prefer it to any dip I have used. From Mr. James M. Thomas, Estancia Santa Rosa, Monte, June 29, 1881.—Having given a good trial to Gillard's Dip, I have much pleasure in bearing my testimony to its valuable quality as a Sheep Dip. It destroys all insects with which sheep are infested, makes readily in cold water, does not injure the hand, and softens all hard parts. I shall strongly recommend it whenever an opportunity offers. As regards the cheapness, it should command a good sale.

NOTE.—A sample drum will be supplied gratis to any Estanciero who is willing to give the Dip a fair trial and report on same

THE QUIET RAMBLES OF A YOUNG NATURALIST.

(By E. W. White E.Z.S.)

No. VIII.

(Continued.)

Now, the obligation to improve the navigation of the Upper Uruguay, implied by the treaty before referred to, a navigation which is at all times impossible to vessels of any draught, except during the floods, can never be fulfilled, in consequence first of the Herculean difficulties to be overcome, and next to the inter-jealousies of the high contracting parties. The stream is one mass of rapids, boulders, sand and debris, and its current, regulated like a mill race, opposes successfully everything but steam power. Boats and canoes take days to warp up a mile or two, and even the 40 ton Argentine steamer Estrella which, when possible, plies hereabouts, is sometimes delayed en route for days instead of so many hours, in default of adequate means of propulsion.

Amongst remedial measures, extensive canalization has been mooted, but it scarcely requires the eye of an engineer to predicate the futility of an expedient of that nature, for the artificial channels would be by the first freshet; let alone the fact, that on whichever side these works should be attempted, they would undoubtedly encounter powerful opposition from the holders of the ultra bank. The idea of connecting the two great rivers by a canal crossing the peninsula from Itapua to the neighborhood of Santo Tome, thereby increasing the flow of the Uruguay and facilitating its navigation, though a tempting idea, has like-wise not only been entertained but proposed by a gentleman of sanguine temperament who, not taking sufficiently into account the difference of their levels, nor the circumstances that the Sierras of Iman lie intermediate and would necessitate tremendous cuttings, has expressed himself ready, I believe, to complete the undertaking at his sole cost.

By the nature of these matters, however, can a solution of the problem be obtained. If the Uruguay is to be rendered navigable, its bed must be cleaned for hundreds of miles, and to effect this! Argentinian labour not all the regal dymite and clicking dredges in Christendom would suffice! No! the hopes of any transit facilities for Misiones must be based, for many years to come, on the extension of the East Argentine Railway along its eastern fringe to Santo Tome, with perhaps a branch across the isthmus to the wonderfully thriving and populous town of Itapua, an enterprise which would, no doubt, be very costly, owing to the number of streams and swamps to be spanned, but quite practicable and hereafter to be remunerative.

But, no matter what operations may be undertaken in the future for the improvement of the land or water carriage of this distant region, certain important measures of very pressing urgency demand instant attention, amongst the chief of which is the construction of a reliable map of the territory. By listening to the Syreic voice of the Standard advertisement columns, I was inveigled into discerning \$25 for that of Del Vaso, which is nothing but one tissue of errors, and like all others published by individuals in this Republic, an instance of what may be termed the "Fictitious" method of cartography, by which delightfully simple and childish process, with closed eyes, a coast line may be rapidly delineated, any number of places dotted, and mountains and rivers thrown in of a heap by way of "filling up." This map of Del Vaso's I set myself to work to correct, but the labour grew, patience diminished, and at last I was tired out. The best existing one perhaps is that of the old Jesuits, which, I believe, is in the hands of Mr. Coaker of Concordia; but the Provincial Government of Corrientes possesses several, as usual

very incorrect, and which, not agreeing with one another, open the door at least to endless mistakes, if not to casuistic dealing, so that 'concessionaires' holding from that quarter need be on their guard lest, after parting with a valuable consideration, they should find themselves in possession of titles valid only to a mythical soil, a 'chateau on Espagne.'

There is not a Topographical Department in Buenos Aires, with men capable of fixing and registering a point and drawing a straight line scientifically exact? If so, then it appears to me that their valuable services are needed not less in Misiones than on the Rio Negro, whilst the aid of the surveyor to plot and the telegraphist to connect this founding with the parental centres of civilization, are demands that ought not to be long resisted.

(To be continued.)

PARTIDO DE CHASCOMUS.

A WONDERFUL AND MOST CURIOUS DISCOVERY.

On Wednesday, 29th ult., the most extraordinary and wonderful remains of an animal were discovered on the establishment of Don Santiago Spret, known as the Estancia Progreso, situated about three leagues (East) from the Lezama Station on the Great Southern Railway. The animal discovered, which, by the opinions of the numerous persons who have seen it, together with John Hartick Esq., of the Estancia Loma Victoria, of the same Partido (who is considered some authority on such matters) is pronounced to be a species of tortoise; it was first discovered by Mr. Ninian Spret, son of the worthy estanciero of the Progreso, about 200 feet from the River Salado, and close to his comfortable and well regulated puesto. This wonderful animal measures 6 feet long, 3 feet broad, and 3 ft. 6 in. depth; the jaws, which are large, have teeth from 2 1/2 to 4 inches in length; its great and unwieldy shell is composed of round or small octagonal shape shells all closely joined together, and round the neck is a curious circle of shell in a conical shape, and the portion of the feet or leg of the animal that has been found, measures about 6 inches. Mr. Ninian Spret had great difficulty and labour in excavating the monster, and from the extreme hardness of the earth it must have been and is (so say some of our worthy camp naturalists) an anti-diluvian animal, at any rate it is a great curiosity, and it is in your Museum, it would certainly cause a great sensation amongst the learned and curious of the city of B. Aires. Ninian Spret's discovery on the 'Progreso' camp has caused quite a sensation, and his neat and comfortable little puesto by the Salado is daily besieged by visitors, of all classes, and from all parts, that you see youth and beauty tripping it along on foot to see the wonderful sight, or the supposed anti-diluvian animal.

Camps and stock are in good condition for this time of the year, and business in general in this partido is going ahead, especially when you hear of our friend Don Juan Hartick, the next estanciero to the Progreso, having on his land 200,000 bricks ready for erecting some imposing structure in September next.

EDITOR'S TABLE.

The Royal Mail steamer Nova arrived at Montevideo yesterday with European dates to the 13th June. Captain Evans, of the lost Doterel, was under arrest, awaiting trial for court-martial. Germany has abandoned both the Russian and Italian alliance. The agitation in Ireland gets worse every day and the measures of the Government more stern. There is another Fenian scare in England, owing to the expected arrival of agents of the society from America, to blow up all the public buildings.

The French mail steamer Oronoco sails this afternoon. The mail bags close at the Gen. Post Office at 1 o'clock to the minute.

The Coliseum is the rendezvous to night. We believe that every one in town who understands a word of English is going. Our German friends, who all speak English as fluently as the O'Donoghues, are all going to the Vateriaud. We wish to offer a word of friendly advice to Mr. Martin's audience: Go early, and take half a dozen pocket-handkerchiefs with you, as there are passages in the lecture that will draw tears from the toughest heart in the assemblage. 'Hemos dicho!'

The news from over the water is brightening up again. President Vidua says he must retire from office as his health has broken down under its cares. No wonder. H.E. must have a perpetual headache. Another Ministerial crisis is going on, and Latorre and his merry men are now expected early in Spring. Meanwhile the brokers on the Bolsa have got up a rouse in Public Securities, which have risen 2 p.c. cent.

H.M.S. Rifleman sailed for Montevideo on Wednesday.

The mails from the West Coast are bare of news and there is hardly a line worth giving to the printers. The latest telegrams announce that the threatened conflict on the Taxes Bill between the Senators and Deputies of Chile has ended in peace and the passing of the Bill.

All our native colleagues are now discussing Misiones. To our mind the highly interesting letters of our talented young friend Mr. E. W. White are worth bushels of all the elaborate articles we refer to.

It was said yesterday that the Master of the Mint had received orders to begin coining, and that all the precious metals required have been offered from Bolivia. Good news this.

Some of our colleagues are patriotically turning the now at the Colon Theatre the other night, between the police and three private Jhus into political diatribe. 'Oh ever thus!'

Some of the National war vessels have been assigned a singular piece of duty—to bring up from the Patagonian coast cargoes of shingle wherewith to macadamise h. P.aseo de Julio and the road to Palermo. Better have them doing this than eating their heads off, if we may be allowed the expression in the case of a ship.

The nationalization of the Misiones will change the face of the Upper Uruguay on both sides of the river. We see that the Rio papers are urging on the Imperial Government that to put its best leg forward in that quarter and foment the navigation of the river, colonies, new industries etc. And yet the Governor of Corrientes wants to keep Misiones!

The Nation says there is not a word of truth in the report that the late Mrs. Dorrego bequeathed 15 million paper dollars to finish the church at Flores. We're sorry for the church.

A colleague asserts that there was not a crumb, or even the livering of a turkey left, at Baltar and Quesada's late lunch on Wednesday. Men never feel so hungry as when feeding at other people's expense. There is a mysterious exhibition in it.

We had the pleasure of a conversation yesterday with Mr. Skull who has just imported 200 magnificent ostriches from the Cape. He says this is a far superior climate for ostrich farming than South Africa and predicts the most brilliant results for this new industry. A good stock of ostriches gives almost as good a return as a league of land in the year.

The flag which our glorious countryman Admiral Brown flew at the battle of Los Pozos will be carried in the parade to-morrow at the head of 200 sailors of the National Squadron.

A gentleman living in Calle Victoria was driven the other night to roll up his head in his blankets and exhibit sundry other symptoms of temporary insanity during the night through the utter impossibility of getting a wink of sleep, owing to some unearthly sounds emanating from the telephone wires on the roof of his house. The unfortunate man passed the whole night in reversing his prayers and pater noster under the sun to Hades and condemnation, to the dogs and farther. In the morning, when on the verge of the grave from exhaustion, he interviewed our talented colleague the editor of the Pampa, who explained to him that the noise arose through the insulators not having been placed on the wires. He went home a wiser but very sleepy man.

A morning colleague calls attention to the fact that some of the Argentine Consuls are unpleasantly hard up. The Consul at Lisbon has written to the Government for 500 patacas, to pay the passage of self and family to the Plate, as he has not a penny at command. There seems to be a screw loose somewhere in the financial part of the Consular service.

The courts have just decided a lawsuit that has lasted since the Yellow Fever year, the result being that the fortune left by a leading doctor who died of the disease is diminished for his family to the amount of three millions of paper dollars which have to be handed over to a natural son of deceased.

A painful case is announced. The Federal Judge of Catamarca, having prudently kept out of the way while the late patriotic revolution was going on there, found, when he got back, that some 4—ear good natured friend or friends unknown had drawn and pocketed his salary during his absence. Up to the present it has been impossible to find out who fobbed the cash.

We received yesterday from that Garden of Eden, the Land of Apples, a solitary but delicious sample of that fruit a partially for which led our Mother Eve to play the mischief with the whole of us. We are indebted to Lieut. Rhodes of the 24 of the Line, for sending it to us, and invite our fair readers to call and see it.

The latest exploit of the Nihilists was to place a miniature coffin, containing an effigy of the Ozar in wax, with a poignant stick through the breast, on a table in His Majesty's dressing-room. The Empress hap-

pened to enter the room during her husband's absence and, seeing the coffin, got such a fright that she could not sleep for several nights. Her Majesty is unceasing in her efforts to induce the Ozar to grant a Constitution to his people, but she has failed as yet.

The good news from Washington about President Garfield has caused the greatest pleasure in all classes of society. An eminent physician told me yesterday that the wound cannot be so serious as reported in the first telegram; if the kidneys had been at all injured by the bullet, the illustrious patient would have died ere this.

Governor Rocha sent a short draft Bill to the Chambers yesterday, authorizing the Executive to contract with a hydraulic engineer for plans for draining the parts of the province requiring it, irrigating canals, opening canals, and constructing ports in the South. This is most important.

The Libertad says that the name of the Plaza Once de Setiembre is to be changed to that of 'General Urquiza.' There is really nothing in a name. Napoleon would have whipped Europe, (la periferia) excepted if he had been born a Jones, or Robinson, though Robinson the Great might sound queer in history.

The famous lady violinist, (Camille Urzo), will make her debut on Monday next in the Coliseum, at the concert to be given by the Quartette Society, the attractions of which will be greatly increased by the fact that Mrs. Krutshoff, so well known in our high musical circles, will sing three or four classic 'morceaux' on the occasion.

The 12th of November next promises to be rather an exciting day. Professor Swornat, a North American savan of German origin, fully agrees with Mother Shipton when she says—

And the world to an end will come.

In Eighteen hundred and eighty one, and he announces that the 12th of November, at midnight sharp, will see the end of this planet. On that day Jupiter, the Sun and the Earth will be in conjunction, and a collision with a comet will finish this mundane sphere, dashing it into billions of little bits. Brokers and guttersnipes taking 'long shots' in Cedulas and National Banks should be careful not to go beyond the 31st of October, as the Comet will be the liquidator on the next settling day. It is hardly worth while to consolidate the Bank debts or abolish forced currency.

PASTO FUERTE CAMPS.

To the Editor of the Standard.

Dear Sir,

Now that so many new estancias are being started on 'pasto fuerte' camps, I wish to state my experience as to the best breed of English cattle wherewith to cross the native breed. Within the last ten years I have crossed native cattle with both shorthorns and Herefords on 'pasto fuerte.' In every way the Herefords have done the best. The young stock especially thrives better in the winter, and the fattest animals in the 'rodos' are always Herefords and not shorthorns.

I have been told by several people that the same has been found in many other parts of the world, including the United States, Canada, Australia, California, U.S. and the Cape of Good Hope.

The Americans are large buyers of Herefords for the Western States, as they say they find that the Herefords 'wrestle' better in the winter, as is only natural they should, having much thicker hides than the shorthorns. Cattle crossed with Herefords will stand the cold winter storms, such as that of September last, better than either native cattle or shorthorns, having longer hair, thicker hides and harder constitutions.

Having tried both, I strongly recommend the Hereford breed for 'pasto fuerte,' and beg to remain,

Yours sincerely,

One who has tried both.

WEATHER TELEGRAM.

HOWARD'S CELEBRATED HARROWS.

Howard's Iron Harrows. Howard's Drag Harrows with Handles. Howard's Self-Lifting Wheel Harrows.

These Harrows have stood the test of many years experience and still remain unrivalled, the demand being greater than ever. Hundreds of thousands are in use. They are strong, durable, and thoroughly adapted for all kinds of work. The tines—which are all steely—are so fastened that they cannot get loose, and unlike Colonial-made imitations they can be readily taken out for repair.

The following are some of the most useful sizes:—

Prices in England.

No. 11, for two or three animals, 10 feet wide, weight 2½ cwt. 4 0 0
No. 12, for two animals, 9½ feet wide, weight 2½ cwt. 3 10 0
No. 14, for one or two animals, 8½ feet wide, weight 2½ cwt. 3 3 0
No. 20, for one animal, 7½ feet wide, weight 1 cwt. 2 17 6

Prices in England.

H 10, a pair of 4-beam Harrows, with whiplashes, 9½ feet wide, weight 3 cwt. 7 7 0
H 16, a pair of 2-beam Harrows, with whiplashes, 7½ feet wide, weight 3 cwt. 6 17 6
H 17, a pair of 3-beam Harrows, with whiplashes, 9½ feet wide, weight 3 cwt. 6 0 0
H 17, a pair of 3-beam Harrows, with whiplashes, 7 feet wide, weight 2½ cwt. 4 15 0
H 18, a pair of 4-beam Harrows, with whiplashes, 8 feet wide, weight 2½ cwt. 5 6 0

Prices in England.

L 1, for two light animals, with 12½ x 34 tines, 4½ feet wide, weight 2½ cwt. 8 10 0
L 2, for two or three animals, with 17 tines, 4½ feet wide, weight 3½ cwt. 8 10 0
L 3, for three or four animals, with 23 tines, 4½ feet wide, weight 4½ cwt. 10 10 0
L 4, for four animals, with 25 tines, 4½ feet wide, weight 5½ cwt. 11 0 0

The above Implements kept in Stock by the Principal Hardware Merchants.
